ADVENTURE MOUNTAINS. SERFAUS. FISS. LADIS.

Enjoy exciting nature experiences!

Thomas Brezina's Adventure Mountains. Our three adventurous hiking trails for families will captivate and fascinate your children. Kids will not only discover nature in a playful way, they can also solve all kinds of riddles like detectives. The colourful adventure pad is available for €3.00 from all Serfaus-Fiss-Ladis cable car ticket offices and the Serfaus-Fiss-Ladis tourist information offices. All of the income generated by „Country Charity – We are Family“ benefits local and regional social projects. The patron of the project is the author and TV presenter Thomas Brezina.

Piratenweg. Serfaus. On a stormy night, a ghost ship has been sighted. On board: Captain Pepper and the sailor Chilli. To make matters worse, the ship and all aboard have been cursed! Everything is now up to the master detectives. They must find the treasure. However, where on earth is the treasure chest hidden, and what is the treasure that must be found?
Pram-friendly. Walking time approx. 2 hours.

Hexenweg. Fiss. The young witch Peppina and her brother Fips urgently need help! There has been an explosion on the Hexenweg Trail. The two young magicians have blown up the witch's house. Numerous objects have been whirled through the air and scattered along the trail. **Not suitable for prams** (a pram-friendly path with the same start and end points runs alongside parts of the trail). **Walking time approx. 1.5 - 3 hours.**

Forscherpfad. Ladis. Oops! The hikers suddenly feel as if they've been shrunk and see everything from an ant-sized perspective! What on earth has happened? All we know is that a mysterious tree house has been discovered in the middle of the forest. **Not suitable for prams. Walking time approx. 1 hour.**

HÖG ADVENTURE PARK. SERFAUS.

The Hög Adventure Park is all about Alpine farming and forestry. A fairy tale about how the Högsee lake came into being is told in a giant milk churn. There are numerous exciting play areas dotted around the Högsee lake. A shallow water area was created especially for the youngest visitors. Water sports enthusiasts can explore the lake on pedalos or rafts, or dare to jump into the water from the diving tower. Several bathing jetties and a floating island invite visitors to relax and sunbathe. In the full-service Seealm Hög restaurant, we will spoil you with trendy vegetarian and vegan dishes, fish specialities, home-made ice cream, smoked trout and home-made bread, for example.

Apiary. Here we can view these industrious insects up close and learn interesting facts about them.

Hög Family Lights Chapel. This peaceful place for quiet contemplation is situated at the end of the Högsee lake. It is suitable for the whole family and welcomes all faiths. It is also the starting point of the 450-metre Contemplation Trail, which features seven artistic sculptures that symbolise the Lord's Prayer.

WOLFSEE. FISS.

Realm of lynxes, wolves and bears.

A walking and recreational trail for the whole family has been created all around the Wolfsee, a reservoir close to Fiss. The circular walk blends into the gentle, hilly landscape and is well worth a visit even just for the views: Deciduous and larch forests broken by meadows and masses of flowers. The banks of the reservoir also offer an exceptional educational experience for adventurous and curious kids where they can learn more about the behaviour and habitats of the wild lynxes, wolves and bears through play. Besides a set of adventure steps for climbing and balancing, there is also a bear's den for them to explore, a small stream to splash about in and much more. In the section dedicated to the lynx, children and their parents sneak along the edge of the forest like hunting predators until they reach a play and information area in the shape of a lynx paw print. A cave not only affords spectacular views of the Wolfsee through a waterfall but also features several information boards with lots of fun facts about brown bears. The adventure steps, made up of various climbing and balancing elements, also lead directly to the bear's den, and because bears love honey, as every child knows, there is also a beehive-shaped climbing tower and a carousel with a honey pot.

Geochaching

The starting point is the tourist information office in Fiss, where everything you need to know about the cache is displayed on an information board. The exciting GPS treasure hunt pays homage to the wild animals that used to live here on the high plateau, such as wolves, bears and lynxes.

GEORAMA LASSIDA. SERFAUS.

The fascinating world of rocks and fossils: The Georama Lassida gives explorers and hobby scientists an insight into the world of geology and archaeology. In the huge sandy dig area at an altitude of 2,350 metres, children can go on a tour of exploration and discover rocks from primeval times.

Stone ball companions on their adventure: The stone marbles are available from a stone dispenser in the entrance area and are used at the stations with interactive games.

Motor skills trail: The motor skills trail calls for coordination, agility and balance.

Rest and relaxation in the Alpine garden: Whilst the kids zoom carefree around the motor skills trail, their parents can sit down and relax. The many rest and relaxation areas afford fantastic panoramic views.

Georama Loop Trail Lazid: This pram-friendly loop trail runs from Lazid to the top station of the Lawens cable car and back again. Hikers along the approx. 1.5 km long loop trail are treated to the most glorious mountain views!

Lassida restaurant: In our cosy parlours or on the sun terrace featuring panoramic "Georama" views, let us treat you to hearty Tirolean cuisine, homemade wood-fired pizza and homemade ice cream.

Opening hours:

22.06. - 13.10.2024 open daily from 8.30am - 4.30pm.

GOLDEN MAN TRAIL. CHILDREN'S MINE. FISS.

Climbing giants, greedy gnomes and a „Golden Man“ that was devoured by the mountains of Fiss are the main characters of a fairytale story that takes us way back to a time when the region was awash with legends. The hunt for the heart of the „Golden Man“ begins when the young shepherd Fulgenz suddenly finds a piece of gold whilst exploring the mountains of Fiss and talks about his discovery down in the valley. Ever since, eerie laughter and gleeful cheers break the stillness of the night as the mean gnomes set off to mine the mountain with their hammers and pickaxes. Will Fulgenz and his friends be able to save the Golden Man from the greedy gnomes?

Success via eleven stations – the „Golden Man Trail“

Join Fulgenz and his friends on their mission to stop the greedy gnomes and defeat these mean dwarves with your knowledge of nature. On this adventure trail, you can look forward to eleven educational stations full of surprises. At the end, the Golden Man is bound to be grateful for your efforts.

Children's Mine. Once the Golden Man's breath had turned the gnomes to stone, the quarry became a truly amazing playground. On the Schönjoch in Fiss, mine explorers of all ages can look forward to many exciting play areas with balancing and coordination equipment, climbing frames, slides and swings, a maze and a cave adventure tunnel.

At the BergDiamant panorama restaurant, we'll spoil you with an international cuisine, dishes fresh from the wok and crisp salads, as well as an extensive cake buffet, delicious desserts and refreshing ice cream sundaes.

HOLZKUGELWEG. WATER & SAND PLAYGROUND. SERFAUS

The Holzkugelweg trail starts below the Alpkopfbahn cable car mid station. There are 1,500m of different wooden ball tracks to play on. Every course is different and promises a new challenge. UNDERGROUND. SERFAUS.

Serfaus already decided to reduce the local traffic way back in the 1970s. The Serfaus underground finally opened in 1985. After it had been in operation for more than 30 years, the underground and all of its stations were completely refurbished and modernised. The new underground no longer merely serves the transport of passengers; a specific theme was allocated to each of the stations, which now feature stories about the past and present of Serfaus.

Car park station: The starting point towards a paradise for families. The new access tunnel conveniently connects the car park with the station; children can play away the time until the next train is due in one of the numerous play areas.

Church station: On two floors, this station highlights the village's cultural history and development for tourism. The interesting stories about Serfaus make the time fly past – and might possibly also make you miss the next train!

Central station: This station is dedicated to the village's clubs and associations, which are presented on large information boards. It also features a huge hidden object picture and lenticular images to entertain the kids!

Cable car station: This station is dedicated to technology – an exhibition at the station explains in detail how the Serfaus underground works. The highlight is certainly the large adventure machine, great fun not only for our younger visitors!

Learn more about the underground on a weekly guided Behind the Scenes tour. The guided tour will be held in German only. Must be booked in advance!

LADIS VIA FERRATA. LADIS.

Put your climbing skills to the test in Ladis! Laudeck Castle is perched spectacularly on top of a crystalline slate rock formation that offers the perfect conditions for an eventful day spent rock climbing. The „Quarzit Wand Burg Laudeck“ via ferratas offer all climbing fans three short but exciting routes with the wonderful sounding names „Via Claudia Augusta“ (blue), „Pons Laudes Steig“ (red) and „Laudecksteig“ (black).

Via Claudia Augusta. Various climbing elements such as wooden footholds, a climbing net and a shaky bridge high up on the air that runs directly along the rock face add interest to this via ferrata. The undisputed highlight is a wooden bridge that takes some courage to cross.

Pons Laudes Via Ferrata. This medium difficulty via ferrata is on the left of the first route and is therefore a little more difficult to manage, as the two steep difficulty level C stretches call for quite a bit of muscle power. There are also relatively few footholds.

Laudecksteig Via Ferrata. Good climbing skills and muscle power are needed for the difficult Laudecksteig via ferrata as it starts with a slight overhang. It takes a lot of physical strength and good coordination to get past this initial point.

MOUNDS. SERFAUS. FISS. LADIS.

Serfaus-Fiss-Ladis has long since established itself as a top family destination. In the summer of 2016, a major family music festival was added to the countless Alpine attractions for young and old and the outstanding hiking opportunities and wellness offers to increase the range of entertainment for the whole family. The festival is an exciting treat for children; the mountains are a fantastic venue for live music as its echo is carried far beyond the borders of Tyrol.

The family-friendly region will hold the festival for the seventh time from 14. - 19.07.2024, transforming the Alpine landscape into the world's largest stage. During the 6 days, numerous workshops and concerts take place every day. The Mounds Music Festival is perfect for the whole family!

The workshops are suitable for all children who enjoy music. They learn interesting facts about rhythm, singing, composition, dance, various instruments and much more. The focus is always on having fun. An awful lot of fun for the children. Some of the workshops also address interested parents and grandparents, who can learn a lot about singing and making music with their children and might even discover their own talent for music.

The daily finale will take place each day on the large, central festival stage in Serfaus, featuring at least two concerts and sometimes with the participation of the kids from the workshops.
